Tec-Hackett, Inc. is Indiana's specialist in factory automation. We offer a full lineup of electrical, hydraulic, pneumatic, safety and other automation products that assist you in keeping your plant and its processes running at their peak. Whether you are building new equipment, upgrading or maintaining existing equipment, our Technical Sales Team has the expertise to assist you with the selection and support for your unique application needs.

SICK is a global leader in the manufacture of Photoelectric, Inductive, and Capacitive Proximity Sensors, Safety Scanners, Light Curtains, Barcode, Vision, Encoders & more. Call our SICK Expert with your questions!

ABB is one of the world's largest providers of AC and DC drives, soft starters, contactors, motors, servo motion, robotics, low voltage controls, terminal blocks and more. Call our ABB Drives Expert with your questions!

Baldor provides AC & DC motors for your specific application: General Purpose, Fan, Inverter Duty, Severe Duty, Washdown, Explosion Proof, High Efficiency, and more.

Lumberg offers a complete range of quality industrial connectivity and wiring solutions, including sensor cables, cord sets, connectors, signal distribution and remote I/O.

Meltric is a provider of a complete range of engineered plugs and receptacles, including the Decontactor series, a switch rated product that provides worker safety and simplifies NFPA 70E compliance.

Producer of high quality, precision, motion components, including linear guideways, ballscrews, integrated linear stages, linear motors, linear actuators, robotics and measuring systems.

Established provider of high quality pneumatic and fluid control products such as actuators, air preparation (FRL), solenoid valves, proportional valves, push-to-connect fittings and other products for pneumatic applications.

Best in class products, solutions and support in the pneumatic industry, providing air preparation, actuators, slides, grippers, multi-power, valves, rotary actuators, crimpers, rod locks, vacuum generators and more.

Worldwide leader for engineered hydraulic components and solutions, including sub base and stackable solenoid valves, proportional valves, fixed and variable vane pumps, and a range of piston pumps. Tec-Hackett stocks a large selection of Continental Hydraulics products.

A dependable partner in hydraulic power technology, providing variable displacement axial-piston pumps for a wide range of demanding applications.

Precision pneumatic and hydraulic cylinders built specifically for your application, including tie-rod, telescopic, NFPA standard and full custom solutions based on your specifications.

Structural Aluminum Extrusions (T-slot) for machine frames, bases and guarding. Build it yourself or let Tec-Hackett help design and build your system for you!

Your local Account Manager is ready to address your needs, but don't forget that we have an experienced staff of factory trained **Customer Service Representatives** at our Fort Wayne, IN location that can answer your questions. Call Customer Service at 260-471-7208 or email sales@tec-hackett.com.

Tec-Hackett Engineered Systems

Tec-Hackett has the technical resources to design and build system solutions to your hydraulic power unit's (HPU) specifications. We use modern CAD software to create custom HPUs that can not only power your machine, but seamlessly fit into your creative design and space requirements. Our HPUs are fully assembled and tested at our Fort Wayne, IN fabrication facility, and can be painted to match your company's colors scheme.

In addition to design and assembly, Tec-Hackett's on-staff Hydraulics Specialists can assist you with your troubleshooting needs. We offer field service or you can send us your existing machine for in-house diagnosis. Let us be your problem solvers!

Ask your local Account Manager for more details on Tec-Hackett's HPU capabilities.

From concept...

...to reality.
