IMI Norgren is a long-established provider of high quality pneumatic air preparation (FRL) and motion control products, now part of IMI.

Together with IMI Bimba and IMI Bahr, offering a range of pneumatic and electric motion control products.

Schroeder offers industrial filtration solutions which enable customer success in the areas of hydraulic fluids, lubricants, fuels and process, including diagnostic monitoring and analysis.

Continental offers hydraulic components and solutions, including sub-base and stackable solenoid valves, proportional valves, fixed and variable vane pumps, and a range of piston pumps. Ask about our large local inventory!

Sensor Intelligence.

SICK is a global leader in the manufacture of Photoelectric, Inductive, and Capacitive Proximity Sensors, Safety Scanners, Light Curtains, Barcode, Vision, Encoders & more. Call our SICK Expert with your questions!

WAGO is focused on electrical interconnection, automation and interface electronic technologies, offering PLCs, Remote I/O systems, power supplies, relays, and terminal blocks to connect your world.

Automation

CamoZZi Automation is a global leader in the design and production of motion and fluid control components, systems and technologies for Industrial automation, Transportation and Life Science industries.

Structural Aluminum Extrusions (T-slot) for machine frames, bases and guarding. Build it yourself or let Tec-Hackett help design and build your project for you!

A dependable partner in hydraulic power technology, providing variable displacement axial-piston pumps and specialty valves for a wide range of demanding applications.

Precision pneumatic and hydraulic cylinders built specifically for your application, including tie-rod, telescopic, NFPA standard and full custom solutions based on your specifications.

Hydreco Hydraulics is a leading provider of motion control solutions for mobile hydraulic applications, offering gear pumps, directional control valves, pilot controls, PTOs and more.

ABB is one of the world's largest providers of AC and DC electrical products, including variable frequency drives, soft starters, contactors, motors, low voltage controls and more. Call our ABB Drives Expert with your questions!

Meltric is a provider of a complete range of engineered plugs and receptacles, including the Decontactor series, a switch rated product that provides worker safety and simplifies NFPA 70E compliance.

Emmegi's range of products spans air cooled, water cooled, and oil cooled heat exchangers for industrial applications, freight trains, oil drilling platforms, in-transit cement mixers, generators, and much more.

Nachi Hydraulics is a global manufacturer of hydraulic pumps, valves, flow controls hydraulic power units and other hydraulic products. Products are readily available from their North American headquarters located in Greenwood, IN!

Your local Account Manager is ready to address your needs, but don't forget that we have an experienced staff of factory trained **Customer Service Representatives** at our Fort Wayne, IN location that can answer your questions.

Tec-Hackett Engineered Systems

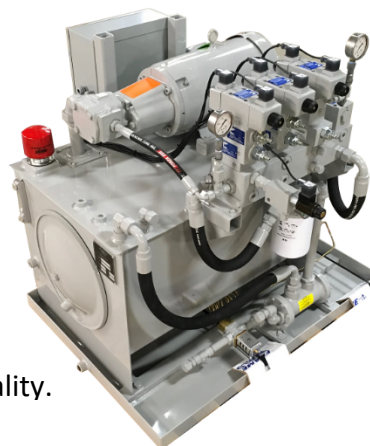

Tec-Hackett has the technical resources to design and build system solutions to your hydraulic power unit's (HPU) specifications. We use modern CAD software to create custom HPUs that can not only power your machine, but seamlessly fit into your creative design and space requirements. Our HPUs are fully assembled and tested at our Fort Wayne, IN fabrication facility, and can be painted to match your company's color scheme.

In addition to design and assembly, Tec-Hackett's on-staff Hydraulics Specialists can assist you with your troubleshooting needs. Let us be your problem solvers!

Ask your local Account Manager for more details on Tec-Hackett's HPU capabilities.

From concept...

...to reality.
