

Tec-Hackett, Inc. is Indiana's specialist in factory automation. We offer a full lineup of electrical, hydraulic, pneumatic, safety and other automation products that assist you in keeping your plant and its processes running at their peak. Whether you are building new equipment, upgrading or maintaining existing equipment, our Technical Sales Team has the expertise to assist you with the selection and support for your unique application needs.

SICK is a global leader in the manufacture of Photoelectric, Inductive, and Capacitive Proximity Sensors, Safety Scanners, Light Curtains, Barcode, Vision, Encoders & more. Call our SICK Expert with your questions!

ABB is one of the world's largest providers of AC and DC drives, soft starters, contactors, motors, robotics, low voltage controls, terminal blocks and more. Call our ABB Drives Expert with your questions!

Baldor provides AC & DC motors for your specific application: General Purpose, Fan, Inverter Duty, Severe Duty, Washdown, Explosion Proof, High Efficiency, and more.

WAGO is focused on electrical interconnection, automation and interface electronic technologies, offering PLCs, Remote I/O systems, power supplies, relays, and terminal blocks to connect your world.

Meltric is a provider of a complete range of engineered plugs and receptacles, including the Decontactor series, a switch rated product that provides worker safety and simplifies NFPA 70E compliance.

Structural Aluminum Extrusions (T-slot) for machine frames, bases and guarding. Build it yourself or let Tec-Hackett help design and build your project for you!

Norgren is a long-established provider of high quality pneumatic and fluid control products such as actuators, air preparation (FRL), solenoid valves, proportional valves, push-to-connect fittings and much more.

Camozzi Automation is a global leader in the design and production of multi-technology motion and fluid control components which use pneumatic, proportional, and electrical technologies, with innovation as a

Worldwide leader for engineered hydraulic components and solutions, including sub base and stackable solenoid valves, proportional valves, fixed and variable vane pumps, and a range of piston pumps. Tec-Hackett stocks a large selection of Continental Hydraulics

A dependable partner in hydraulic power technology, providing variable displacement axial-piston pumps and specialty valves for a wide range of demanding applications.

Precision pneumatic and hydraulic cylinders built specifically for your application, including tie-rod, telescopic, NFPA standard and full custom solutions based on your specifications.

Hawe Hydraulik produces and develops "Solutions for a World Under Pressure." Products include high quality hydraulic pumps, motors, valves and cylinders for the mobile, industrial and oilfield industries.

Your local Account Manager is ready to address your needs, but don't forget that we have an experienced staff of factory trained **Customer Service Representatives** at our Fort Wayne, IN location that can answer your questions.

Call Customer Service at 260-471-7208 or email sales@tec-hackett.com.

Tec-Hackett Engineered Systems

Tec-Hackett has the technical resources to design and build system solutions to your hydraulic power unit's (HPU) specifications. We use modern CAD software to create custom HPUs that can not only power your machine, but seamlessly fit into your creative design and space requirements. Our HPUs are fully assembled and tested at our Fort Wayne, IN fabrication facility, and can be painted to match your company's color scheme.

In addition to design and assembly, Tec-Hackett's on-staff Hydraulics Specialists can assist you with your troubleshooting needs. Let us be your problem solvers!

Ask your local Account Manager for more details on Tec-Hackett's HPU capabilities.

From concept...

...to reality.
